The issue of The National Association Of Broadcasters not wanting XM Radio to have the ability to broadcast locally oriented content appears to be Big business at it's best. Don't try to improve your product but force out the competition in any way possible. I am paying for this service from XM Radio and believe it is a much better service than local stations offer. I like the fact that I don't have to wait for a specific time for weather and traffic. Severe weather and traffic jams don't wait for a specific time. I hope you make the correct choice on this subject and don't let big business influence you. Thank you very much. Jeffrey A. Rockel
